I'm a developer located in Alpharetta, Georgia, who has spent the last couple years doing full stack development on a web application for an electronic medical records company. I'm currently looking for a position that is at least half frontend web development, and would prefer to continue working with Angular 4.

Skills

Frontend Languages

TypeScript/JavaScript, SASS/CSS, HTML

Frontend Tools

Angular 1.x, Angular 4, Node.js, NPM, Bower, Grunt, jQuery, WebStorm, Visual Studio Code, Jenkins

Backend Development

C#, .NET 4.5.x, Web API, Visual Studio, Java, Maven, Apache Tomcat, PHP

Databases

SqlServer, Oracle, MySQL

Experience

Surgical Information Systems – Alpharetta, Georgia

Project Mercury

Rewriting legacy application for the Cloud using TypeScript, Angular 1.4, and SASS on the frontend, .NET Web API webservice, and a SQL Server database. Transitioned to Angular 4 in Spring 2017.

Fall 2014 - Summer 2017

SIS Com

Maintaining and enhancing an existing patient tracking application. Flash displays launched and configured through a web portal and pulling information from Java based Rules Engine and Message Router and an Oracle database.

Spring 2009 - Fall 2014

Education

B.S. Computer Science

Southern Polytechnic State University

Fall 2008
